

# PRINCIPAL'S MESSAGE TO PARENTS

*With the fresh surge in cases of CoVid and the emergence of a new variant, Omicron, we're now entering another short period of the 'Online Teaching Learning Methods.' In such a situation, it is not only the responsibility of teachers and students, but also of the parents to keep a proper check on their ward. Parents shall ensure that their ward is attending the classes in full preparation which includes wearing uniform, keeping books, notebooks and stationary items ready, etc. They shall also check if their ward is completing his/her assignments on time, if he/she is attending each and every period without any distraction of any kind, be it social media or anything else.*

*At proper intervals, copy submission dates will be announced when the parents will have to come to school for the offline submission of their assignments.*

*Parents must also encourage and ensure the participation of their child in the extra-scholastic activities that school keeps on organizing every now and then.*

*At the end, they must take utmost care of themselves and their families. They shall also consume a healthy diet and follow all CoVid related norms to avoid contraction of illness.*
